

## Kids & Family

### Fitbit for Kids: Ace 3—Fun, Fitness, and Peace of Mind

At Fitbit, there's a wearable for every age. For your little ones, the Ace 3 offers a child-friendly design with basic Fitbit features, while older kids can step up to the Inspire 3. These devices provide a safe, engaging way to encourage healthy habits and keep parents connected to their kids' well-being.

## A Design Built for Kids

### Playful Animations

Keeps fitness fun and engaging

### Simple Controls

Easy for kids to navigate

### Sleep and Activity Reminders

Helps kids stick to healthy routines

### Comfortable Wear

Kids can enjoy their playground activities

## Simplified Technology

The Ace 3 tracker is designed with simplicity in mind, offering only essential features like timers, alarms, step counting, and a child-friendly account that parents can monitor. It tracks activities such as hopping, stepping, and jumping, encouraging kids to stay active and have fun.

Kids can even share and compare their activity stats with friends through their accounts, fostering friendly competition and physical activity.

## Smart Features for Peace of Mind

The Ace 3 is more than just a fitness tracker—it's a tool that helps parents stay connected to their children's well-being. With sleep tracking, parents can ensure their kids are getting the rest they need for an active lifestyle. Notifications let older kids with smartphones receive updates without unnecessary distractions.

EXPLORE THE ACE 3

The Ace 3 prioritizes safety by limiting access to social media and restricting device use to features like step tracking, alarms, and timers. These thoughtful designs give parents confidence that their kids are building healthy habits without being overwhelmed by technology.
